**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 11 September 2000.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "9" has been used to designate both service provider access and external access unit (i.e., personal access). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The disclosure is objected to because of the following informalities: pages 3 and 4 of the specification referenced different parts to a same character "9".

Appropriate correction is required.

### ***Claim Objections***

3. Claims 1-4 are objected to because of the following informalities: the phrase "the subscriber", "the exchange", "the tariff", "the CDR" and "the cost", etc. are used through out the claims that could be modified to improve claim language. Appropriate correction is required.

4. Claims 5-6 are objected to because of the following informalities: reference character "9" is referred to both service operator and data terminal and reference character "6" is referred to both tariff server and bill server. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2643

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Cameron et al (6,317,490).

Conisder claim 1, Cameron et al teach a process for signaling cost information in a telecommunications network (*see abstract*) comprising the steps: the subscriber's data terminal (1) establishes a connection to an exchange (2) (*see col. 2 lines 31-37, lines 54-66; col. 4 lines 59-65*), the exchange has a call handling function (6) (*see col. 4 line 57 – col. 5 line 17*) which makes a tariff request (10) to a tariff server (4) (*see col. 5 lines 2-34; lines 52-57*), the tariff server sends a tariff response (11) for the requested connection to the call handling function (6) of the exchange (2) (*see col. 5 lines 52-67*), the call handling function (6) forwards the tariff response (11) to a CDR generating function (7) in the exchange (*see col. 4 lines 39-56; col. 6 lines 50-60*), the CDR generating function (7) forwards cost information to the cost communication function (8) of the exchange (2) (*see col. 4 lines 39-56; col.6 lines 50-60*), the cost communication function (8) communicates the cost information to the subscriber's data terminal (*see col. 2 lines 30-37; col.6 lines 50-60*).

Application/Control Number: 09/659,453  
Art Unit: 2643

Consider claim 2, Cameron et al teach a process for signaling cost information characterized in that the tariff server has access to a subscriber database containing current tariff data (see col. 3 lines 18-48).

Consider claim 3, Cameron et al teach a process for signaling cost information characterized in that the current costs are updated upon the connection establishment and/or during the existing connection (see col. 6 lines 1-20, lines 50-65).

Consider claim 4, Cameron et al teach a process for signaling cost information characterized in that the information of the tariff server (4) is updated with the aid of a bill server (5) (see col. 6 lines 1-20, lines 50-65).

Consider claim 5, Cameron et al teach a tariff server (4) with connections to the exchange (2) to a bill server (5) (see Fig. 6; col. 5 lines 12) to a service operator (9) (i.e., subscriber administration) to a data terminal (1) of subscribers (see Fig. 1; col. 2 lines 30-60) wherein the tariff server (4) has a charging rate function (13) (see col. 5 lines 2-12) which is connected to a subscriber database (14) (see Fig. 6; col. 3 lines 18-45).

Consider claim 6, Cameron et al teach a tariff server (6) characterized in that the subscriber database (14) is adapted to the current cost situation by current data of the bill server (5) (see col. 3 lines 18-48; col. 6 lines 1-20, lines 50-65).

#### **Conclusion**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
